Luxury Swedish Wood Fired Hot Tubs

Our mission is to bring some luxury wood fired joy to every home & garden in the UK. With our simple, safe and efficient Swedish wood fired hot tubs we are doing just that. All our tubs are manufactured in Europe to the highest standards and all materials and methods used are second to none.

We create our tubs using PE moulded into our custom designs. This method means the tubs are completely recyclable, almost indestructible and totally family safe. There is a choice of 3 types of wood finish, Cedar, Spruce & Thermowood to keep everyone happy! We also stock two types of hot tub setup, internal and external heated and a full range of extras and accessories.

Our Swedish Hot Tubs manufacturing facility is located in Europe with specialist rotomoulding equipment used to create our luxury hot tub range. We have distribution facilities in both Lincolnshire & Shropshire where we can assemble and send out your new Swedish Hot Tub 6 days a week!

Basic Hot Tub Range

Prices from £1,915

Prices
include
free
delivery

Our Basic range is the ultimate hot tub to relax with up to 4 - 6 people of your choice. With our Hot Tubs all imperfections of traditional hot tubs are solved by using a unique design and production process. Our Hot Tubs consist of one piece of polymer moulded from recyclable PE plastic and a quality wood surround of your choice. No Welding seams and sharp edges in the inner shell. The breathable wooden frame gives the Hot Tub a recognisable authentic look and ensures that no moisture is created between the inner shell and the wooden frame.

The Basic range also aligns with our core values that are so important: quality, safety and care for the environment. Our Basic range is fully assembled upon delivery, all you need to do is place the tub where you wish, fill it with water, and ignite the stove.

Each Tub Comes With

- PE molded plastic shell
- Choice of either Red Cedar, Spruce or Thermowood
- Choice of Internal or External heater
- Grate with ash drawer
- 2 stainless steel straps
- Insulating ring under seat
- Drainage set

Why a Swedish Hot Tub?

- A molded PE plastic inner shell
- No welding or seams present in the shell
- No sharp edges
- Leakage is impossible
- No problems with polyester or fiberglass osmosis
- Water-Saving Design
- Quick warmed
- High-quality materials
- Safety first
- Fully recyclable inner shell
- Focusing on the customer designed and produced
- Authentic appearance
- Breathable wooden frame
- Low maintenance
